**341 E. Michigan Avenue**
**Clinton, Michigan 49236-9564**
**(517) 456-6501 Superintendent's Office**

January 11, 2022

Dear Parent/Guardian,

.

We have been notified today of the following positive covid-19 cases for January 10, 2022 and January 11, 2022:

Pre School-0
Elementary: 3
Middle School: 3
High School: 3

The definition of a close contact is listed below. You will be contacted if you or your child has been identified as a close contact and is required to quarantine. If your child does not qualify as a close contact, you will not be contacted. We sincerely appreciate our parents and students cooperation.

PARENTS:
If you are contacted by Clinton District personnel or the LCHD who are close contact tracing, please refrain from using threats, expletives, and derogatory remarks. I have received several formal complaints from our staff regarding parent behavior and threats. Please be respectful and kind as we endeavor to follow local health department protocols.

It is with an abundance of caution that we remind our families of the following information:

If your child develops any symptoms consistent with COVID-19, please call your child's healthcare provider as well as the school. Symptoms of COVID-19 may include: fever/chills, cough, shortness of breath or difficulty breathing, fatigue, muscle/body aches, headache, new loss of taste/smell, sore throat, congestion/runny nose, nausea/vomiting, or diarrhea. Additionally, if your child is sick or you suspect that they may have been exposed to someone who is exhibiting the above symptoms, keep them home.

This is an additional reminder that we must do everything we can to follow prevention practices including: wearing face coverings, maintaining 6 feet of distance from others, washing hands frequently, and monitoring for symptoms including:

- Temperature 100.4 degrees Fahrenheit or higher when taken by mouth
- Sore throat
- New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Diarrhea, vomiting, or abdominal pain
- New onset of severe headache, especially with a fever

If you note any change in the health of your child, please call your regular medical provider.
It is strongly recommended by the CDC, Michigan Department of Health and Human Services, and Lenawee County Health Department that all persons, regardless of COVID-19 vaccination status, wear a facemask while indoors.

Although strongly recommended, it is not required that any person wear a facemask inside except when on a school bus.

COVID-19 vaccination is strongly recommended by the CDC, Michigan Department of Health and Human Services, and Lenawee County Health Department for all individuals who are eligible. There are no current requirements that any Lenawee County school staff member or student be vaccinated against COVID-19

**TRANSPORTATION**:
If your child is using Clinton Community Schools transportation, they are required to wear a mask. Please send your child with a mask for the morning and afternoon bus runs. A mask will be provided if a student does not have a mask and they are expected to wear it while on the bus.

**TESTING:**
**Anyone with symptoms should be tested**. Even if your child does not have symptoms, though, you can still have them tested. **Please note, if your child tests negative, he/she will still have to complete the rest of the quarantine period and continue to monitor for symptoms**.
Please visit www.michigan.gov/coronavirustest for a testing location, or work with your primary care provider. If you do not have a primary care provider to order testing, you may call the Lenawee County Health Department at (517) 264-5226 Option 5 and ask to speak to a nurse.

**CLOSE CONTACT:**
**What is considered a close contact?** A close contact is anyone who has been in close contact with someone who has COVID-19, which includes:

- Being within 6 feet of someone who has COVID-19 for at least 15 minutes (cumulative)
- Providing care at home to someone who is sick with COVID-19
- Having direct physical contact with the person (hugged or kissed them)
- Sharing eating or drinking utensils
- They sneezed, coughed, or somehow got respiratory droplets on you

**HEALTH SCREENING:**
When in doubt about your child's health or possible exposure to Covid-19. PLEASE KEEP THEM HOME. This is very important for parents to do each day. Do not send your child to school if you think they are sick or exhibiting the symptoms most often associated with Covid-19.
